### Work History

#### System Engineer in support of the United States Senate, Sergeant at Arms

Peraton

11/2022 to Current

- Reporting to two teams: Internet Email Team and Central Services Engineering Team.
- Wrote PowerShell automation scripts, reducing man hours required and eliminating human error.
- Work with Proofpoint and Message Bird (formally Message Systems) mail systems. Holder of several Proofpoint badges
- Responsible for advanced troubleshooting when the help desk is unable to solve a problem.
- Experience with many systems and tools, including Splunk, Service Now, M365, and some exposure to Azure.
- Well versed in both Microsoft Windows and Linux, including both Debian-based and RHEL, Server and Client OSs.
- Experience with Microsoft Exchange.

## Information Security Engineer – 3d Network Battalion, Hawaii Support Detachment; Marine Corps Cyber Operations Group

### United States Marine Corps

12/2016 to 10/2022

- Oversaw the Vulnerability management team in the remediation of over **1.09 million vulnerabilities** authoring PowerShell scripts used by the team to identify and remediate vulnerabilities, directly contributing to his unit receiving the highest score in the Marine Corps for the Commander's Cyber Readiness Inspection in 2018.
- Assisted in Disaster Recovery from Hurricane Florence by traveling to over 100 sites that were in unknown states of unresponsiveness and assessing current situation and damage. Provided recommendations to higher headquarters and took appropriate actions and troubleshooting to bring all sites back online.
- Designed and implemented the network architecture for 2 annual Marine Corps Marathons, implementing active monitoring technologies and enabling remote command and control over the network, creating the most sophisticated, technologically advanced data network to date for the event, contributing to the successful monitoring of over 15K runners, medical staff, and administrative functions with zero downtime or failures. (Received Navy Achievement Medal)

## Information Security Analyst – National Capital Region; Marine Corps Cyber Operations Group

01/2015 to 11/2016

### United States Marine Corps

- Reclassified to Cyber Network Operator and was sent to school in Twentynine Palms.
- Confronted with a shortened deadline for the upgrade of 9,925 unclassified and 824 classified computers to Windows 10, authored automation of data backup and transfer to reduce required time onsite and prevent data loss. Scheduled, assigned, and tracked the upgrade to an on-time completion.
- Provided remote support to Deployment teams, totaling more than 70 Marines and Contractors, enabling them to quickly address any anomalies and remain on schedule while **authoring scripts and enabling automation of tasks.**
- Strategically planned, organized, deconflicted, and delegated on the spot, taking into consideration concerns from Marine and civilian stakeholders while completing 350+ upgrades within 1 week with no unplanned disruptions.
- Created and maintained PowerShell automation scripts for increasing information accuracy and timely metrics reporting of the National Capital Region.
- Efficiently oversaw the completion of 2K+ Incidents and more than 1,600 Work Orders, including high-level issues affecting generals, executives, and critical systems such as the Emergency Mass Notification System for the continental United States.

## Musician

09/2008 to 12/2014

### United States Marine Corps
